

Type FFU B Polymer Cartridge Filter Housing

The filter housings of the series "Big Blue" FFU-B exist of Polypropylene (PP) and correspond to the FDA regulations. They take up a single filter cartridge with a diameter of 114 mm and a length of 248 mm or 508 mm. The material is extremely continual compared with acids free of oxidation like hydrochloric acid and sulfuric acid up to 70% of concentration, salt solutions, to liquid hydrocarbons, alcohols and to concentrated lyes. These housings are used to the filtration by water and watered acids at temperatures below 40°C.

TECHNICAL DATA

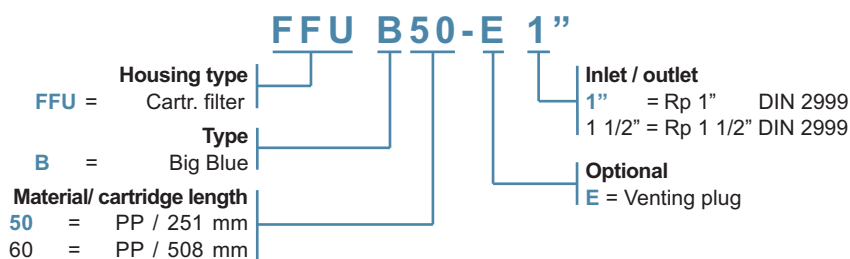

FFU B

	FFU B50	FFU B60
Max. operat. pressure at 40°C (bar)	6,5	6,0
Freight weight (kg)	2,1	3,1
Material filter head	PP	PP
Material filter sump	PP	PP
Material gasket	Nitrile*	Nitrile*
Filter cartridge length	251	508

* also available in other gasket materials
